**CAD Control Systems** has been a service provider to Blake International for many years. This relationship was established prior to Blake's purchase of drilling rigs from Pride International, Inc. in 2008. CAD was already providing services for Pride and that existing relationship carried over to Blake when they took the reins.

CAD Control Systems is committed to being a leader in the design and manufacture of BOP Control Systems, High Pressure Test Equipment, and Diverter Control Systems with regards to quality of product and service as well as technological innovation. CAD continues to help Blake maintain the high industry standards of performance which offers Blake the opportunity to generate a successful platform for continued growth and successful operations in the Gulf of Mexico.

CAD provides the following services: International and Domestic Services, BOP Control System and operational maintenance training through hands on sessions with trained instructors from CAD, periodic inspections of BOP Control System Equipment, API16D Sizing Calculations to ensure that equipment is continuously meeting the industry standards and to successfully acquire drilling permits and provide 24 hour customer service support. CAD diligently works towards excellence and continuous improvement in an effort to meet customer's needs and exceed their expectations.

The company recently signed a deepwater contract with Anadarko Petroleum Corporation for three wells to mobilize the Blake Rig 1007 onto the Constitution Spar at Green Canyon 680 A. Beau reports that this is the third contract Anadarko has awarded Blake International since entering into the deepwater market in 2011.

The Blake 1007 recently completed a project for Anadarko on the Marco Polo TLP, and is currently working for Fieldwood Energy on the Ewing Banks 826A platform to fulfill a two well contract. The remainder of the Apache contract, followed by the Anadarko project, is expected to keep the rig busy through July 2014.

Beau comments: "We are excited to work with Anadarko again. Blake International has maintained a very good relationship with Anadarko; as a result, they consistently utilize our rigs. This contract also strengthens our goal to be the preferred platform rig contractor in the Gulf of Mexico. We anticipate that Anadarko will be very busy for some time, and it is one of the companies we are considering refurbishing a rig for next year."

Elaborating on the company's activities and progress in recent years, Beau adds: "In 2009 we saw demand growing in deepwater, specifically on TLPs and Spars that require a platform rig. Our
